

ZURU DNA

Good Humans Only

- Our team members are either 'creating our future' or 'have lived in our future'
- Talent density
- Experts leading experts
- Specialisation
- Hyperspecialisation — only the best become generalists
- Meritocracy
- Everyone is responsible for HR

Compounding Improvement

- Aim for 2% improvement per week (improvement compounds)
- Set high standards even for small things
- Complacency is our enemy
- Relentless pursuit of marginal gains
- We suck now compared to where we will be in the future
- Cross-pollinate and share learnings always

Radical Candour

- Constructively dissatisfied
- Radical feedback
- Brains trust — constantly judging our own work
- Relentlessly looking for actionable insights
- Debate hard. Contest and stress test ideas to get the best outcome.

Shift the Needle

- Fire bullets. Fail fast
- Speed of innovation
- Always be experimenting - test and learn
- Getting-things-done mentality
- Less fluff, more doing
- Never stop hustling
- Persistence, persistence, persistence
- Work product and marketing assets hard
- CTPs - Creation Touch Points
- Fight the creep
- Bias for action

Overprepare & Win

- Look after the micro and the macro will look after itself
- Work out how to win the battle before entering the arena
- Simplification. Rationalise. Streamline
- Always be thinking about your ROT and ROI
- Make 10 fast decisions to get 7 right, rather than 2 slow decisions to get both right
- The Four Pillars of Persuasion
- Be obsessed with the details
- Develop pipelines

Collaboration

- Team members rather than employees
- We, not I
- Build strong framework, let the magic happen
- Leadership is on the dance floor, not the balcony
